

Junior Wellness Package

We know how important your pet's health is. Our wellness packages are designed to help make sure your pet stays healthy by offering convenient, thorough, comprehensive care. Our packages make it easy for your pet to receive all their wellness care for the entire year!

The goal of our pet wellness program is to prevent or minimize disease, improve your pet's quality of life, & help your pet enjoy a healthy life as long as possible. Give your family member the quality care he or she deserves.

Vaccinations

Vaccination protocols are customized for each pet based on their lifestyle. Your pet will receive all recommended vaccinations to protect them from serious contagious diseases that they are at risk of contracting. Lyme vaccines will be at an additional cost.

Parasite Testing

Our Junior Wellness package includes two semi-annual intestinal parasite screenings, & a heartworm test. Some intestinal parasites are contagious to humans & other animals, so the Center for Disease Control & Companion Animal Parasite Council recommends twice yearly intestinal parasite screenings. You can get more information by visiting www.cdc.gov/nceh/ehs/Topics/VeterinaryMedicine.htm or www.petsandparasites.org/

Wellness Examinations

On average, pets age seven times faster than people do. Because pets age so rapidly, health problems can occur in a short amount of time. Pets often don't show any outward signs of illness until the disease is in the advanced stage. The risks for cancer, diabetes, obesity, arthritis, heart disease, metabolic problems, & other serious conditions all increase with age. Regular wellness exams allow your veterinarian to detect, treat, & prevent health problems before they become serious. They are also a great opportunity for you to ask your veterinary team about pet behavior, nutrition, flea & tick control, & other issues on a regular basis. Visit www.npwm.com for more information.

Junior Wellness Blood Work

Our Junior Wellness package includes an annual blood panel to check organ function & blood counts. Blood work provides early detection of infections, anemia, clotting issues & changes in organ function. This may prevent your pet from getting ill or having to be hospitalized, & may prevent permanent damage from occurring. Treating problems early can help with a better outcome & lower treatment costs.

****Packages expire one (1) year from the date of purchase.****

Our Package cost is \$300, or \$100 down, & \$19 per month!
