

## Puppy & Kitten Wellness Packages

Congratulations on the new addition to your family! Our packages make it easy to give your new pet a healthy start during their first year of life to make sure they are happy, healthy, & protected.

Bringing home a new pet can be very overwhelming. At Young's, we are dedicated to helping answer any questions you may have about your new companion.

The goal of our pet wellness program is to prevent or minimize disease, improve your pet's quality of life, & create a foundation for your life-time companion. Give your new family member the personalized quality care he or she deserves.

## Vaccinations

Vaccination protocols are customized for each pet based on their lifestyle. Your pet will receive all recommended vaccinations to protect them from serious contagious diseases that they are at risk of contracting.

## Wellness Examinations

Puppies & kittens grow & develop at a rapid rate, requiring frequent veterinary wellness exams to monitor their development. Because pets age so rapidly, health problems can occur in a short amount of time. Wellness exams are a great opportunity for you to ask your veterinary team about pet behavior, nutrition, flea & tick control, training, pet insurance, & any other questions you may have about your new pet.

## Intestinal Parasite Screenings & De-worming

All puppies & kittens receive three intestinal parasite screenings, and two doses of de-wormer. Often times parasites are passed on by the mother, & can make your pet very ill. Some intestinal parasites are contagious to humans & other animals, so the Center for Disease Control & Companion Animal Parasite Council recommends regular intestinal parasite exams & de-worming to protect both your pet & your family.
